

TBZ Belt conveyor

Composed of a fabricated folded sheet metal chassis, the **TBZ conveyor is used for intensive industrial conveying.**

Its simple, compact, stiff and fixable design endows it with great reliability and optimizes maintenance costs. Manufactured in our Sedan works.

Its ergonomics have been designed to meet legal requirements in terms of **personal safety, maintenance and service ability**, in compliance with current technical standards, in particular the **Machinery Directive 2006/42/EC**.

Common fields of use

Dry
products

Products
 $\leq 500 \text{ kg/m}^3$

Papers/
boxes

Bottling

Usual fonctions

Conveyor with concave and convex inflection

High flow • Lift

Main characteristics

Standard belt widths	Length	Linear speed	Belt conveyor
630 - 830 - 1 030 mm	$45^\circ \leq \alpha \leq 90^\circ$	$\leq 0,50 \text{ m.s}^{-1}$	Cleat band PVC or PU 

Pre-equipment for options

Impact bars

Band tension adjustment

Advantages

Very reliable industrial equipment

Robust design

Optimized maintenance

Low energy motor

High quality components

Small footprint
